

Hello and Happy Holidays!

This message is a notice/reminder about the recent Westchester Power opt-out mailing to newly eligible residents in the ConEdison utility service territory regarding their impending enrollment into the program, which should have been received in their mailboxes by this point.

The end of the 30-day opt-out period for these residents is January 16th, with services starting on their first meter-read date on or after February 1st.

We are excited about having a new group of folks coming into the fold to assist in our collective mission for a clean energy future. As they may be less familiar with our program compared to those who have been enrolled for some time, please do forward any inquiries on to us and we'd be happy to assist residents.

Sustainable Westchester is hosting two informational sessions (@12 and 6pm) for newly eligible residents on Tuesday, January 4th and we would love for you to pass on the word to constituents as you may see fit. Attached to this email is our event graphic for your convenience as well. Thank you and be well.

All the best,  
Nick Tedrow
