

PROJECT STATUS UPDATE: 2019 CROTON HYDRILLA CONTROL PROJECT

REPORT DATE: 09/23/2019-10/04/2019

Prepared by: Nicole White, NYSDEC Invasive Species Coordination Section

Project Description: Hydrilla (monoecious) discovered 10/19/13 in Croton River. Surveys have been conducted annually since 2014 to delineate the hydrilla infestation in the Croton River as well as several high-risk sites within a 10 miles radius including the Hudson River and its tributaries. To-date, no hydrilla has been found in proximity outside the Croton River and the New Croton Reservoir. A five-year management plan was created to control Hydrilla in the Croton River. After successful treatments in 2017 and 2018, the treatment proposed for 2019 again involves the injection of the aquatic herbicide Sonar Genesis®, also known as fluridone, into the river just below the New Croton Dam and at Black Rock Park with a target concentration of 2.0-4.0 parts per billion (ppb) for 90-120 days.

Tasks Completed:

- Drinking water samples collected 9/23, 9/25, 9/27, 9/30, 10/2, 10/4
- Drinking water RESULTS: 9/16, 9/17, 9/20, 9/23, 9/25, 9/27: Fluridone levels all below 1.0 ppb and listed as “Normal”
- Drinking water samples 9/30, 10/2, 10/4: still at lab
- Tanks refilled 9/26, 10/3 by Licensed applicator (Units also inspected 9/23, 9/25, 9/27, 10/4)
- Submersed Aquatic Vegetation (SAV) surveys have been completed at ALL 29 high priority Hudson River sites – an early detection effort for hydrilla in sites that are in proximity to the Croton River and have suitable habitat characteristics for hydrilla – **NO HYDRILLA FOUND**
- SAV Surveys in Croton River completed – **NO HYDRILLA FOUND**
- Project status presented at NAISMA conference 9/30-10/4
- Treatment scheduled to end 10/16/19

Upcoming Tasks 10/07/2019-10/18/2019		
Task #	Description	Lead
1	COMPLETE fluridone treatment (2-4 ppb for 120 days) of entire Croton River	ISCS/SOLitude/SePRO
2	Post water quality sampling results to webpage	ISCS- McGlynn
3	NYS Hydrilla Task Force call	ISCS
4	Conduct Croton River tuber surveys	SOLitude

Internal Group Members: Nicole White, Catherine McGlynn, Anthony Lamanno, Cathy Ahlers, Bill Rudge, Justin Perry, Josh Thiel

Support: Brenan Tarrier/Dan Kendall (DOW), Lloyd Wilson/James Leach/Jim Hyde (DOH), Wendy Rosenbach (R3 CPS)
